### Venice Design Week

Venice Design Week (VDW) offers the public the opportunity to experience and interact with the design world. VDW has evolved into a melting pot where people connected to or interested in Design can meet, exchange ideas and thrive, bringing home new impulses, contacts and inspiration. The International Competition about Wearable Technologies displays in the Palazzo Mocenigo Museum of Fashion. In town there will be many other exhibitions that explore other branches and aspect of design including interior design, light, items designed for utility. Quirky approaches cohabit with more traditional approaches in exhibitions such as "equilibri" where the balances of the aesthetic and the functionality are the main elements, or "the elegance of the black swan", where the extraordinary ideas transform into everyday life. Displays in Museo di Palazzo Grimani. Next edition 7-15 October 2017. The Design Week is a time for networking in a special atmosphere where the pleasure of beauty is the topic while cocktails are savored.

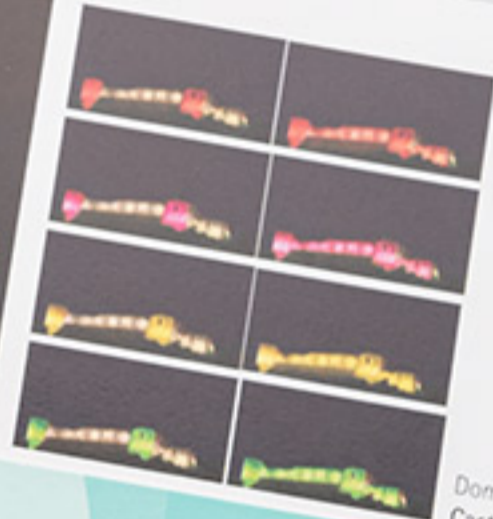

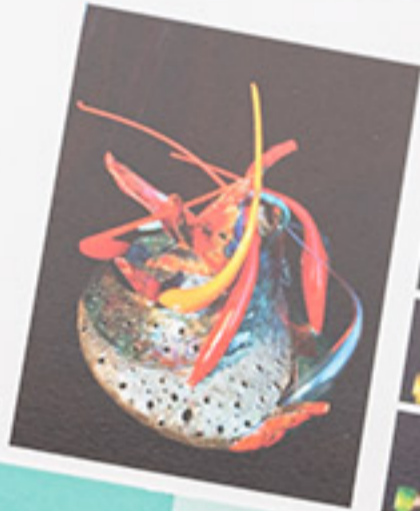

#### Venice Design Week in Montreux

Light used to create atmosphere and emphasis, with shadows underlining shapes. This is the theme of the Venice Design Week competition "The Light Emphasizes 2016". In Montreux in the section Design Lighting selected designers are Ana Maria Reque, Stefano Lupicano e Sara Martinelli and some other designers you can meet in MAG. In the section Architecture selected architect is Domenico De Rito with "Cosenza lives the Castle".
